**Cybercrime On Telegram: How Hackers Using App To Share Data Leaks**

The localisation of OTT communication platforms, the development of the LED interface, and the integration of satellite operations were also discussed in other topics on the schedule. The workshop, which was blessed by Dr. Fikir Melese, WESA Secretary General, started with a keynote address from him, where he shared his thoughts on the current state of the digital and media landscape. He emphasized the importance of digital transformation and its impact on various sectors, including education, healthcare, and entertainment. The workshop concluded with a panel discussion, where experts from different fields shared their insights and perspectives on the future of the digital landscape.

The workshop's success was attributed to the active participation of the attendees and the high-quality discussions that took place. The participants were encouraged to continue their efforts towards developing a robust and secure digital environment for Pakistan.

**Pak-Iran Gas Pipeline Project Can Help Pakistan To Meet Energy Demands**

Pakistan is facing a severe energy crisis due to a persistent shortage of electricity and natural gas. The Pakistan-Iran Gas Pipeline project is being considered as a solution to Pakistan's energy needs. The project is expected to enhance Pakistan's energy security and reduce its dependency on imported fuel.

The Pakistani government has been actively promoting the project, and the project has received funding from various international donors. The project is expected to be completed in the next few years and will help Pakistan in meeting its energy demands.

**Wild Polioviruses Finds In Environmental Samples From Peshawar**

It is essential for parents and caregivers to take necessary precautions regarding their children's vaccination. The Pakistan Polio Laboratory has reported the detection of wild polioviruses in environmental samples taken from Peshawar, a city in Pakistan. The detection of wild polioviruses poses a significant risk of transmission to the susceptible population, including children. Parents and caregivers are advised to ensure that their children are fully vaccinated as per the recommended schedule.

**Smart Steps Called To Tackle Growing Food Insecurity In Pakistan**

The World Food Program has announced plans to increase its efforts to combat food insecurity in Pakistan. The organization has called for immediate action to address the increasing food insecurity in the country.

The Pakistani government has been working closely with the World Food Program to implement measures to address food insecurity. The government has allocated funds for various initiatives to increase food production, improve food access, and enhance the nutritional status of the population.

**Some Common symptoms of the disease include, reduce fatigue, reduced intake of food, depression, reduced feather picking, reduced egg production, and increased mortality rates**

The Federal Board of Revenue has announced set conditions for importers of STZs. The board has set conditions for the import of machinery, equipment, and materials required for the operation of Special Technology Zones (STZs).

The conditions include the submission of a detailed proposal, the appointment of a local agent, and the payment of import duties and taxes on a timely basis. The board has also introduced the concept of a "key person" for each project, who is responsible for ensuring compliance with the conditions.

The Federal Board of Revenue has stated that the conditions are aimed at ensuring the smooth operation of STZs and maintaining the integrity of the program. The board has also stated that the conditions are in line with international best practices.

Coccidiosis in chickens can present with varying symptoms, depending on the severity of the infection. In mild cases, infected chickens may show no signs of illness, while in severe cases, some common symptoms of coccidiosis in chickens include

- Reduced feed intake
- Weakness
- Diarrhea
- Bloody diarrhoea
- Bloody mucus
- Dehydration
- Fasting

Some causes of coccidiosis in chickens include

- Inappropriate feed and water
- Inappropriate temperatures
- Inappropriate litter
- Inappropriate lighting
- Inappropriate ventilation
- Inappropriate sanitation
- Inappropriate use of antibiotics
- Inappropriate use of growth promoters
- Inappropriate use of vaccines
- Inappropriate use of feed additives

In conclusion, sunflower is a valuable and versatile crop for Pakistan's agricultural economy. Its significance extends beyond its role as a food source, as it also plays a key role in the production of biodiesel, protein, and other by-products. As sunflower production continues to grow, its importance in the global market is likely to increase, potentially leading to economic benefits and job creation. Understanding the potential of sunflower and its various applications is crucial for future planning and decision-making in the agricultural sector of Pakistan.
What relationship exists between the states of a country and the states of a region in terms of health security?

This question has received increased academic attention in light of the COVID-19 pandemic. The relationship between the states of a country and the states of a region in terms of health security is crucial. The security of a country’s health is dependent on the security of its neighbors in terms of health status and that of the region as a whole. This is because infectious diseases can spread across borders and regions, and the health of one country or region can have a direct impact on the health of others. Understanding this relationship is essential for developing effective health security policies and strategies at the national and regional levels.

National Security Health: Look Forward Call To National Security Council Of Pakistan

Cybercrime On Telegram: How Hackers Using App To Share Data Leaks

The International Health Regulations (IHR), disseminated in 2019 under the patronage of the World Health Organization (WHO), were expanded in 2016 to detect, assessing, reporting, and responding to all events that could potentially constitute public health emergencies of international concern (PHEIC).

In general, it appears that most data leaks and hacks are only shared on Telegram after being sold on the dark web – or the hacker failed to find a buyer and decided to share the information publicly and more. Some of the data leaks were old, but many were as recent as a few days ago.

What we today call national health security? The answer is obvious. If there was one country in the world that could declare a national emergency, it should be Pakistan. The international health security nexus have depth case studies of the COVID-19 – soldiers in the Americas led to the Americas, and were taken. In that time, they can be almost any country, it is imperative for all countries, especially Pakistan. But Pakistan’s national health security? The answer is obvious. Malaysia Can Lead Digital Economy With Mastercard Data And Services Hub

The launch of Mastercard’s Digital Economy Hub in Malaysia will solidify the position of Malaysia as a leading contender in the region’s digital economy landscape. The Digital Economy Hub and Services Hub in Kuala Lumpur (KL) is in the view of Minister of Finance, Tengku Zafrul bin Tengku T compromised and Digital, Digital, Digital in Malaysia. Malaysia, Malaysia and Singapore, Malaysia and Singapore, Malaysia has a strong commitment to positioning its country as a leader in the global digital economy. The new hub will provide a platform for businesses and startups to collaborate and innovate, creating a dynamic ecosystem for the digital economy.

Malaysia, UK Sign MoU To Strengthen Cooperation In Higher Education Sect

The exchange of academic staff, teachers, and experts on initiatives that will be advantageous to both parties is also covered by the MoU. The provision of talent training programs, which will be provided to in-service and pre-service teachers by the two respective universities, will provide an opportunity for the two countries to work together in the ongoing education reform in Malaysia and the United Kingdom. The MoU also addresses cooperation in the areas of innovation, online learning, lifelong learning, and internationalisation.

AbhBengGPT Allows Players To Practice Negotiating Skills

AbhBengGPT is a chatbot game created by Malaysian Oxford Tag that allows players to haggle for an iPhone with a Malaysia phone seller. The game is powered by ChatGPT and is designed to help players practice their negotiation skills. By simply sending a direct message to the game, players can engage in a negotiation scenario where they can practice their negotiation skills in real-life situations.

Johor Open Launches First Industrial Microalgae Carbon Capture Facility

Based on the preliminary estimates of the pilot facility at UR, an investment into a 2,500-hectare commercial plant can pay off in terms of carbon credits within 10 years. The findings are significant for the region, as Johor is a major player in the region’s carbon credit market. The carbon capture facility is expected to open officially soon, and the company is currently in discussions with several potential buyers. The facility will offer a carbon credit solution that is both efficient and cost-effective, and will provide a much-needed solution to the region’s climate change problem.

SYMBOLOGY AND SEQUEL

For Sustainable Startup MYStartup’s successful road to launch in Kuala Lumpur is a testament to the strong support provided by the Malaysian government and the increasing awareness of the importance of the digital economy. The MYStartup program is a platform for startups to showcase their innovative ideas and receive recognition for their contributions to the digital economy.

AbhBengGPT can be downloaded from the App Store or Google Play. Players can practice their negotiation skills and learn how to bargain for an iPhone with a Malaysia phone seller. Players can also customize their bargaining strategy based on the phone sellers’ strategies. The game is open to anyone with a smartphone, and there are no barriers to entry.

Malaysia’s 6 Top Cryptocurrency Apps Of Week

A recent survey by one of the cryptocurrency exchanges revealed that residents in Malaysia are interested in investing in cryptocurrency, with demand increasing in recent years. Malaysia’s growing interest in cryptocurrency has been driven by the rapid rise in digital currencies, such as Bitcoin, which has gained popularity in recent years.

People have been investing in cryptocurrency in recent years, and Malaysia has been no exception. According to the survey, the number of people investing in cryptocurrency in Malaysia has increased significantly in recent months, with a sharp rise in the number of cryptocurrency exchanges and platforms in the country.

A Malaysia-based exchange has recently launched a new platform that aims to provide a secure and simple way for people to start investing in cryptocurrency. The exchange offers a range of services, including trading and asset management, and is committed to providing its users with a safe and reliable platform for their investments.

The exchange has been well-received by users, who have praised its user-friendly interface and competitive fees. In addition, the exchange offers a range of features, including instant deposit and withdrawal options, which makes it a popular choice for investors.

The exchange also offers a range of educational resources to help users understand the cryptocurrency market and make informed investment decisions. These resources include articles, webinars, and videos, which are regularly updated to keep users informed about the latest developments in the cryptocurrency space.

On the other hand, there are also concerns about the potential risks associated with investing in cryptocurrency. While the exchange has a strong focus on security and compliance, it is important for investors to conduct their own due diligence and make informed investment decisions.
